### About the ADC Search Powered by Google

The ADC Search Powered by Google searches pages on the Apple Developer Connection website ([developer.apple.com](http://developer.apple.com)). Please go to [www.apple.com](http://www.apple.com) to search non-developer related content.

Google does not use "stemming" or support "wildcard" searches. In other words, Google searches for exactly the word that you enter in the search box.

Since Google only returns web pages that contain all the words in your query, refining or narrowing your search is as simple as adding more words to the search terms you have already entered.

By default, Google only returns pages that include all of your search terms. There is no need to include "and" between terms. Keep in mind that the order in which the terms are typed will affect the search results. To restrict a search further, just include more terms.

Searched for **(force ) and torque and derivatives and errors and inertial and motion**

Your search - **(force ) and torque and derivatives and errors and inertial and motion**  
any documents.

No pages were found containing "**(force ) and torque and derivatives and errors and i  
motion**"

**Suggestions:**

- Make sure all words are spelled correctly.
- Try different keywords.
- Try more general keywords.
